Benedict Kuunaa-eguo Kongyir

kongyirbenkk@gmail.com | LinkedIn | Personal website

PROFESSIONAL SUMMARY

Ph.D. statistician and data scientist with financial-services experience developing predictive models and Python-based analytical tools. Skilled in Python, SAS, SQL, R, scikit-learn, statistical modeling, machine learning, and translating analytical results into business recommendations.

TECHNICAL SKILLS

Programming & Data: Python (Pandas, NumPy, Scikit-learn), SQL, R (tidyverse), SAS, VBA

Statistical & Machine Learning: Logistic Regression, GLMs, Time Series, Random Forests, Gradient Boosting, Neural Networks, SVM, Monte Carlo Simulation, Model Validation

Visualization & Tools: Power BI, Excel, Git/GitHub

PROFESSIONAL EXPERIENCE

Visiting Assistant Professor in Statistics · Gustavus Adolphus College · St. Peter, MN | August 2026–Present

- Teach statistics and data analysis and guide applied work in data preparation, visualization, statistical inference, and interpretation for audiences with varied technical backgrounds.

Instructor of Record, Statistics · Oklahoma State University · Stillwater, OK | August 2022–May 2026

- Teach undergraduate Statistics and Business Analytics courses; translate complex quantitative concepts for diverse audiences.

Actuarial Intern, Life Technology Solutions · Milliman · Chicago, IL | May–August 2024

- Designed a Python-based scenarios generation tool for model pre-production testing, reducing runtime by over 90%.
- Conducted model sensitivity and economic impact analyses to quantify risk drivers and support reserve adequacy decisions.

Actuarial Intern, Life Technology Solutions · Milliman · Chicago, IL | May–August 2023

- Developed a Power BI yield-curve dashboard using SQL-based data extraction to support scenario selection and ALM analysis, enabling more efficient risk reviews and improving pricing support for life and annuity portfolios.
- Analyzed liquidity vs. illiquidity across market structures to inform scenario design and risk limits for pricing optimization.

Actuarial Intern, Financial Risk Management · Milliman · Chicago, IL | June–August 2022

- Streamlined and automated attribution reports analysis using Excel VBA, leading to about 90% reduction in reporting time.
- Automated the process of producing financial disclosures using Excel VBA, resulting in efficiency in producing financial disclosures and reducing reporting time by about 90%.

KEY PROJECTS & PUBLICATIONS

Predicting Road Accident Injury Severity (OSU) | August–December 2022

- Extracted and cleaned National Highway Traffic Safety Administration datasets.
- Employed Neural Networks, Gradient Boosting trees, and Random Forest to classify accident injuries severity levels.
- Identified key risk indicators and recommended measures to mitigate high injury rates from road accidents.

Customer Attrition Prediction (YSU) | August 2020–July 2021

- Built predictive classification models to estimate customer attrition with 81% accuracy.
- Addressed class imbalance through feature selection and model tuning, delivering insights for proactive risk mitigation.

EDUCATION

Ph.D. in Statistics: Oklahoma State University (OSU) | July 2026
M.S. in Mathematics: Youngstown State University (YSU) | May 2021
B.Sc. in Actuarial Science: Kwame Nkrumah University of Science and Technology (KNUST) | May 2017

LEADERSHIP & SERVICE

President: OSU Statistics Club | August 2025–July 2026
Science and Mathematics Judge: The Ohio Academy of Science | May 2024–Present
Mathematics and Computer Science Judge: Oklahoma State Science and Engineering Fair | April 2025

AWARDS & HONORS

VIK Family Research Fellowship, Outstanding Graduate Teaching Assistant: Oklahoma State University | May 2024
Outstanding Graduate Student in Statistics: Youngstown State University | May 2021
IABA Achievement Award: International Association of Black Actuaries (IABA) | 2022, 2024

PROFESSIONAL EXAMS & CERTIFICATIONS

SOA Exams: Probability (P), Financial Mathematics (FM), Statistics for Risk Modeling (SRM)
Certifications: SAS Certified Associate
